

The earth's ancient forests are unique, centuries-old ecosystems which provide a home for countless species of rare plants and animals. 'Bad wood', or wood logged in ancient forests, is still widely used in everyday products in and around the house. The last remaining ancient forests are disappearing to be turned into furniture, doors and window frames. And there's no need. There is plenty of alternative 'good wood' available to allow the ancient forests to be spared.

	Absolute Preference	Second choice	Avoid these types of wood
LIVING ROOM:			
Table	FSC	Beech, Oak, Pine, Spruce	Abachi, Iroko, Mahogany, Teak
